Summary of Team Lead Experience

- Experience in leading a programming team by allotting responsibilities to team members and creating specifications for individual component development.
- Discussing with and advising functional personnel to provide custom solutions that could not be customized in SAP. Being a techno-functional consultant acted as a bridge between functional and technical resources analyzing the functional requirements and converting them to technical terms.
- Preparation/modification of project related templates (Checklist for the high-level & low-level design doc, code review doc, clarification/issue Log).
- Coordinating the Onsite & Offshore team, providing inputs in the design & development phase
- Understanding of the as-is business process documents to build to-be business process documents & preparation of design documents, problem analysis, complexity determination, effort estimation, preparation of technical specification.
- Preparing the high level & low-level design documents for the ABAP development objects, unit testing of ABAP development objects.
- Assisting the up gradation from older version of SAP R/3 to new version converting ABAP/4 programs, module pools, user-exits and data dictionary objects.
