

Professional Summary

- Close to **ten years** of IT experience, mainly in the field of Data Warehousing and BI technology that includes more than six years of experience in **Business Objects application** and its various versions (**5.X, 6.X, XI**).
- Expertise in handling **BO Development, Upgrade, Migration, Rehosting, and Replatforming** projects.
- Hands-on experience in **designing** a real time **BI architecture** that involved License procurement/Installation/configuration/upgrades/performance tuning / load balancing and capacity planning for enterprise architecture.
- Excellent knowledge in **Data modeling**. Designing **Logical** and **Physical** data models for an enterprise data warehouse or a data mart.
- Expert in integrating BI platforms into other web environments.
- Proficient in implementing **Security** and enforcing **SSO** for Business Objects, by understanding the legacy system.
- Extensive knowledge on Analytical reporting tools, Data Extraction/ Transformation / Loading (**ETL**) tools (**DATASTAGE & Data Integrator**), Metadata Mgmt, Information Portals and Object-Oriented techniques.
- Thorough knowledge in **PeopleSoft HRMS** functionalities like Benefits, Staffing, Compensation, Payroll, Training etc.
- Excellent domain knowledge in Sales and Marketing IT (**SMIT**).
- Proficient in analysis, design, development, testing and deployment in various technologies.
- Successful implementation of all project life cycle (**SDLC**) stages from requirements gathering through implementation.
- Managed and delivered large and complex assignments within **time/cost** and **service level** parameters.
- Independent learner, quick study and adaptable to a variety of situations.

Technical Skills Summary

BI and Data Warehouse:

- Extensive hands-on experience in Business Objects products like **Desktop Intelligence, Designer, Web-intelligence, Infoview, ZABO, Import wizard, RCT, Datasource migration, Publishing wizard, and BCA**.
- Highly proficient and hands-on in **Repository migration, BO auditor, BO server administration, CMC and CCM** modules.

- Expertise in handling distributed & shared **Repositories, Clustering, Configuring and Deploying** BO apps and web servers.
- Expert in handling **multiple BI environments**. Experienced with web and apps server administration.
- Hands-on in ETL tools like **Data Stage** and **BO Data integrator**.
- Adept at data modeling design using **ERwin**.
- Hands-on experience in migration from **Micro Strategy** to **BO** and upgrading from **BO 5.x – 6.x** to **Xi**.
- Proficient at creating **Universes** and sound knowledge in **Universe Builder**.
- Expert in **Full client & Thin client (ZABO)** reporting.
- Thorough knowledge in **Crystal reports** and **Dashboard** designing.
- Prepared/demonstrated **XI** reporting features, best practices, troubleshooting techniques and supporting documents.

Databases:

- Extensive experience in database design.
- Thorough knowledge of Oracle database, SQL, PL SQL, Stored procedures and Triggers
- Experienced on DB2 and SQL server databases.
- Good at SQL tuning and explain plans.

Technical Skills

Operating Systems	WINDOWS 95/98/NT , Windows 2000, Windows 2003, Windows-XP, UNIX
Reporting Tools	Business Objects 5.x, 6.x, Xi R1/R2 (Desktop Intelligence, Import Wizard, Publishing Wizard, Report Conversion Tool, Datasource Migration, Repository Migration, Designer, CCM, CMC, Web-Intelligence, Infoview, ZABO, BCA and, Auditor)
ETL Tools	Data Stage 7.1r, Data Integrator
Server Management	Dameware Mini Remote Control, PCAnywhere, Terminal Service Client
Data Modeling	Erwin 4.1, Visio
Project Management	MS Project Plan
Source Code Control	Microsoft Visual SourceSafe 6.0
Databases	Oracle 8i/9i/10g, MS Access 2000, DB2 UDB, SQL Server 7.0
Database Supporting Tools	AQT, Toad, SQL Plus
Other Supporting Tools	Siebel, Remedy, PeopleSoft8.9, Snag-IT, Lotus STC, Siteminder
Programming Languages	C, C++, Java
Scripting Languages	HTML, ASP, JSP
Web Server	IIS, Apache, Tomcat
Hardware	PC Assembling and Networking
